

Your First 3 Steps

A CALM MONEY MONTH STARTS WITH THREE SMALL MOVES

STEP 1

Write down what comes in

Add up one month of take-home pay (after tax) and side income. Put it in the Income box on the budget page.

STEP 2

List every bill

Rent, utilities, phone, insurance, loans, subscriptions. Note the due date and tick each one off as you pay it.

STEP 3

Give every dollar a job

Plan each category until “Left to assign” is $0 (savings count as a job). At month end, fill in Actual and compare.

Tip: do this on paper first. One honest month of numbers beats a perfect plan you never start.

Monthly Budget

GIVE EVERY DOLLAR A JOB: PLANNED VS. ACTUAL

MONTH _____ **INCOME** _____ **PLANNED SPENDING** _____ **LEFT TO ASSIGN** _____

Category	Planned	Actual	Difference	Notes
Housing				
Utilities				
Groceries				
Transportation				
Insurance				
Debt payments				
Savings				
Personal care				
Kids				
Pets				
Subscriptions				
Giving				
Fun & dining out				
Gifts				
Other				
Total				

Zero-based budgeting: income minus planned spending (savings included) should leave $0 to assign.
